- **WHO:** Physiotherapists, Occupational and Speech therapists, community health workers and community members.
- **WHY:** Community Mapping is necessary to know and understand the communities we work in. This will then enable participants to identify resources in the community that can remove barriers for persons with disabilities and their families.
- **WHAT:** Participation in this program will enable participants to understand the importance of knowing and understanding their community. They will be able to identify local stakeholders in their community for referral and networking purposes. Through these actions, they may be able to effectively refer and support children and families with disabilities by utilising local resources.
