

# Online Training

## Product Training

**CPD accredited (HPCSA members) 3 CEU TBC**  
**R 300, 00 / Free for non-accredited version**  
**1 online session: 3 hours**

- **WHO:** Third and fourth year allied health students from South African universities, as well as qualified professionals who are completely new to seating practice: including occupational therapy, orthotists and prosthetists; speech and language therapy and physiotherapy.
- **WHY:** Seating is a specialized skill requiring postgraduate training. Current curriculums at universities do not prepare students fully for the realities of wheelchair service provision.
- **WHAT:** Participation in this program will enable participants to respond appropriately to much-needed interventions once they enter the public service domain and to provide channels for development and remote support in seating. Participants will have opportunities to apply theory in different contexts and will be equipped with skills to ensure appropriate clinical reasoning and problem-solving. They will be familiarised with the National tender process, spec sheets, and understand locally available devices.
